Education

01/2022 – present

B.Tech IT, D. J. Sanghvi College of Engineering

Mumbai

Skills

Advanced Python Programming

Experience in python programming, industry-level.

C++ Programming

Competitive-level knowledge

Machine Learning

Huge interest and intermediate-level knowledge

Web development

Basic knowledge of web design principles

Certificates

- Python Core
- Data Science
- HTML
- JavaScript
- C++
- Machine learning
- Python for Finance
- CSS
- Java
- SQL

Professional Experience

05/2022 – 06/2022

Python Instructor, CodingZen

Online

Taught intermediate level Python to students

Projects

02/2022 – present

Taskmate, Desktop application

A desktop app, currently in development, that helps with scheduling, task management and time management. Used the Django framework in python.

12/2021 – 01/2022

Stock Prediction ML System, Neural Network

A machine learning system in the form of a neural network that, on naming a ticker, will show it's prediction on the closing price. Uses the YahooFinance API to obtain details and uses Tensorflow to create, train and test the neural network.

08/2022 – 08/2022

Weather prediction ML System, Sequential ML System

A ML System that takes the database of weather data from Austin, TX and uses a Sequential model to predict the next conditions and also plot the existing data using Matplotlib.
